### OUR LANDED HERITAGE

The Public Domain: 1776-1936

By Roy M. Robbins. Princeton University Press. 1942.

"This volume presents perhaps the first attempt to integrate American land history with the other forces that have shaped our civilization. It is not all political, economic and legal; considerable social history is inextricably bound up with public land settlement, which helps to make the whole story livelier and more interesting. This volume therefore constitutes not only a study in history and public administration, but also a study in American democracy." --Preface.
